TRAINING for
SIGN & PRINT
PROFESSIONALS

CONVENIENT.
FLEXIBLE.
AFFORDABLE.
ENGAGING.

Adendo is a training resource tailored to meet the needs of sign & print professionals. By providing online and in-person training, adendo makes it easy to learn and master the skills you need to get the most from your software and your equipment.

Enhance your learning experience by joining the adendo membership community, where you can exchange information with other professionals, seek answers to your questions, and enjoy other cost saving benefits.

LEARNING OPTIONS

E-Course

Enjoy learning on your own schedule and at your own pace with adendo's e-courses. These pre-recorded training modules cover a multitude of subjects and vary in length. Choose a quick tutorial on a specific topic or a full-length course. Combine E-courses with a Community membership to maximize your educational experience and learn from other SAI software users.

Virtual-Training

The convenience and cost-savings of online training combined with the support of a personal instructor. Purchase training in a block of time that meets your needs then schedule time with your personal instructor. Using adendo's video platform, you will be able to view demonstrations, ask questions, or solve specific problems together with your instructor.

Ideal for learning new software programs, setting up new hardware, training new employees, business and workflow management and special applications such as vehicle wraps, traffic signage, ADA and Braille signs, 3D routed signs.

On-site Training

Onsite training is perfect when you need a little more "hands on" training, or you have multiple people in need of training. Get the instructions you need in **YOUR** shop, with **YOUR** equipment, **YOUR** software, while getting **YOUR** job out the door and getting paid.

Mark Rugen is the Managing Director of Learning & Development at SAI. He has over 35 years of experience in the sign and print market and has owned two successful sign shops. He is best known for his advanced experience with Flexi (a.k.a. Dr. Flexi). He is an expert with design software, color management and has taught thousands of users from small shops to large companies such as Boeing, Delta Airlines, General Motors, and the U.S. Army. Mark keeps his training simple to understand and practical for daily use in your shop. He will be the lead moderator of the Flexi Community.

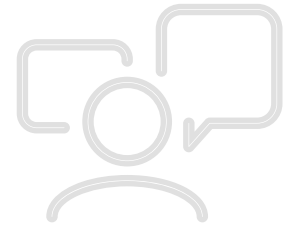

JOIN OUR COMMUNITY

At adendo, we believe that education is enhanced with additional engagement. By talking to other people, sharing your questions, your ideas, your solutions, you will strengthen your knowledge and skills.

We have created a private SAi Flexi Community for this purpose. For a small monthly fee, you can subscribe to this community and receive exclusive member benefits, including:

- Helpful guides & download files
- Exclusive videos not available to the public
- Free webinars
- Discounts on other training programs
- Access to industry experts

Discussion topics on the SAi Flexi Community are well-organized and curated by expert moderators, so you'll never waste time looking for answers. Unlike other online forums or Facebook groups, you will never have to deal with snarky comments or irrelevant content. As a member of the SAi Flexi Community, you can feel confident that you are getting accurate and useful answers.

eCourse Offerings

** coming soon in 2023*

Denny W.

My adendo adviser was very helpful and spoke in clear understandable jargon. He guided me through the process with patience and did so without any hint of condensation. He helped me resolve my problem quickly and efficiently and directed me how to get more out of my program. kudos!!!

Michelle B.

My adviser is a very good teacher, he is knowledgeable as well as a very easy person to follow and understand. I have done two sessions with him and both times he was able to not only help me reach my goal but taught me many useful tips and tricks. Thank you so much! I will be back to get your help to increase my skills and efficiency.

Brendan G.

Our adviser was very patient and extremely helpful in explaining how our new-to-us Mimaki cutter works. He worked through a couple issues I was having with contour cutting and I'm well on my way to getting these dialed in.

Our adviser is a pro and really knows his stuff. And I'm sure this won't be the last time he and I have a chat via Adendo!

Juli W.

I highly recommend Adendo. Our adviser got us a good way down the road to fixing a major color issue on the Flexi interface with our HP Z5200. He is filled to the brim with valuable color information! This is our first experience with Adendo and I am thrilled that we have found this support resource.
